

MINING ENGINEER

Blackwater, Qld

In this role you will develop and monitor mine plans, pit designs, schedules and reconciliations to meet medium and short-term planning and budget requirements. In addition, you'll provide planning and technical support to the Operations department and generate opportunities for continuous improvement in production.

An effective communicator with a strong production focus, you will have the skills and drive to actively support the engineering function on site.

In addition you will possess capability in:-

- Commitment to safe work practices
- Open cut mining operations
- Mine planning software i.e. Vulcan, XPAC, 3dDig
- Good organisational and communication skills

Tertiary qualifications in Engineering (Mining) or equivalent is essential, along with a minimum two years in coal mining operations.

This position is a Monday to Friday, dayshift role. A competitive remuneration package and subsidised accommodation will be provided to the successful applicant.

To lodge your application, please apply online and email your resume and covering letter to jobs@curragh.com.au.
