## *BE PART OF OUR SUSTAINABLE FUTURE*

### **Process Engineer, Coal Handling Preparation Plant (CHPP)**

#### **Blackwater, Queensland**

Curragh mine is seeking an experienced engineer or metallurgist for their Coal Handling and Preparation Plant (CHPP). The primary purpose of this role will be to enhance CHPP performance by completing projects aimed at improving metallurgical efficiency and plant reliability.

Wesfarmers Curragh have announced the construction of a new CHPP so this is an exciting time to join the business.

#### **To be considered for this position you will have the following qualifications and attributes:**

- Degree qualification in Process/Chemical Engineering or Minerals Processing preferred. Applicants with a Mechanical Engineering qualification and experience in minerals processing plants are also welcome to apply.
- Minimum of 2 years experience in minerals processing plants. Experience in CHPP operations would be beneficial but not essential.
- Knowledge of Microsoft Office suite of applications
- Able to demonstrate a track record of making positive step changes to processing plant performance
- Ability to practice good and effective employee relations and communication skills
- Ability to work as an integral part of a diverse team
- Have organisational skills, verbal and written communication skills and a strong focus on safety and efficiency

This position is a Monday to Friday, dayshift role. A competitive remuneration package and subsidised accommodation will be provided to the successful applicant.

To lodge your application, please apply online and email your resume and covering letter to [jobs@curragh.com.au](mailto:jobs@curragh.com.au).
